The information in Table 1 is to provide the PROPOSER with the location of all new/relocated devices to be installed. The table also provides the PROPOSER with point of service (POS) power facilities, whether they are on a local utility pole (Local), or are available through the Commissions facilities (Tunnel or Interchange). For those locations where local power has been identified, a pole number has been provided to the PROPOSER. It is the duty of the PROPOSER to identify all points of service for this project and may choose to utilities the information provided in the RFP, or may utilize a point of service more advantageous to their proposal.
