

The PTC has begun using PennDOT's Engineering and Construction Management System (ECMS) for the advertisement of RFPs and the receipt of Statements of Interest for highway related engineering services. Please note that certain facility-related or non-highway program-related engineering/architectural services may still be advertised outside of ECMS on the PTC's website until further notice.

To view Advertisements/RFPs and the listing of respondents please visit ECMS at <https://www.ecms.penndot.gov/ECMS/>,
