## **Summary of Public Comments**

Questionnaires were distributed during the public meeting plan displays in November 2023. The questionnaires were provided to receive feedback from the general public for the two interchanges (Clarks Summit and Wyoming Valley).

### Clarks Summit Interchange

Sixteen questionnaires were returned to the project team for the Clarks Summit project area. Various comments relating to the project were summarized into ten categories: **1)** traffic, **2)** toll, **3)** project schedule, **4)** property acquisitions, **5)** noise barriers, **6)** property values, **7)** air quality, **8)** public meeting format, **9)** drainage, and **10)** tree removal.

### Wyoming Valley Interchange

Ten questionnaires were returned to the project team for the Wyoming Valley project area. Various comments relating to the project were summarized into seven categories: **1)** noise barriers, **2)** retention pond/stormwater basins, **3)** property values, **4)** property compensation, **5)** drainage, **6)** tractor-trailer traffic, and **7)** project communication.

### Email

Public comments were emailed to the project team from nine members of the community. The emailed comments can be categorized into eight categories: **1)** tolls, **2)** stormwater and flooding, **3)** displacements, **4)** added traffic and pollution, **5)** cost of the project, **6)** positive impacts, **7)** noise, **8)** and property value. Comments have been documented in the project technical file. Responses to comments, if requested, will be completed before or during the circulation of the Environmental Assessment Report.
